Craftsman: one who creates or performs with skill or dexterity in the manual arts. At Sanger, craftsmanship is still an art. From the all sheet glass laminated hull construction, to the custom built driver seat shells, to the custom built rope tows, hand rails and Transferable Lifetime Limited Warranty. We still build a boat with precision and care, one at a time. No other boat builder builds a boat like us! We spend more time to make sure you receive the best boat possible. Every one of our limited production masterpieces, take shape on our ten acre facility in the heart of California’s central valley. The climate in this area has proven to be the perfect blend of heat and humidity for producing the world’s finest boats.

Each boat is rigged by a single team of quality craftsman, with over 40 years of combined experience. This insures that no function was missed, unlike mass production facilities. Almost all of our components are built under our roof, to insure that you receive the best quality that money can buy. Little things such as through-bolted motor mounts and bilge pumps that are mounted to aluminum plates to insure the manufacturing integrity. These are just a few samples of our quality that separates Sanger from the competition. You won’t find us spending big bucks in expensive magazines or sponsoring high price athletes to gain market share, we depend on the thousands of satisfied customers and our reputation. Thus, saving you thousands of dollars and allowing us to focus on what we do best, build the finest quality boat for an affordable price.
Our Sanger Craftsman, some personnel missing.
This large 21 footer will blow you away with it’s quick handling and smooth performance. The V215 is our best crossover model, bringing excellent surfing, wakeboarding and skiing performance. There’s nothing this boat can’t do.

What started as a hobby 65 years ago has become an obsession. An obsession for building the best boats on the market today. Jack Davidson was determined to build a better boat than what he could buy, with this concept in mind he set out to design and refine every new boat he built. With this goal as his driving factor, Jack continued to grow and innovate the boat building world. Today his son Mike and daughter Kathy carry out his legacy of a proud heritage of building the world’s best boats. Sanger Boats has over 100 World Records credited to our hull designs. The Davidson family still oversees every boat built, making certain they all meet the stringent standards that every Sanger boat lives up to. Over the years our mantra has been, “commitment to quality!” Whether it was a 200 MPH hydro or today’s new Matrix 212SL, the concept is simple... build a boat that will perform, ride, handle, and last a long time. We spend the time hand crafting your boat for today’s rigorous performance needs. All you need to do is sit back and enjoy the experience.
